**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohsaki et al. (5,556,723).

Ohsaki et al. teaches a negative electrode for use in a secondary battery comprising milled carbon fibers derived from mesophase pitch wherein the milled carbon fibers each has a fiber cut surface and a fiber axis intersecting with each other at cross angles, the smaller one thereof being at least 65 degrees on the average. Ohsaki et al. teaches in column 7, lines 52-56, a lithium-ion secondary battery comprising the negative electrode, a positive electrode and a separator impregnated with an electrolyte.

***Allowable Subject Matter***

3. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
